## FUNGICIDE 420SC

Registered with the Fertilizer and Pesticide Authority  
Pursuant to PD 1144  
FPA Registration No. 242-053-2117

**ACTIVE INGREDIENT:**  
420 g/L Mancozeb

**A broad spectrum fungicide for the control of fungal diseases of potato, mango, banana, tobacco, and tomato.**

**USAGE:** Apply at a rate of 1.4-16.5 L/ha depending on crops being treated.

### PRODUCT FEATURES:

- ✓ Provides broad spectrum activity with no resistance problem.
- ✓ Economical Protectant fungicide.
- ✓ Excellent tank-mix partner for disease resistance management.
- ✓ Low persistence in the environment and no leaching potential.

### APPLICATION:

**Mancotex 420SC** is applied when leaves first appear. Repeat every 5 to 10 days as required. Use sufficient water to provide adequate coverage. The addition of a surfactant to spray solution will improve performance. It may be applied by air in 3 gallons of water combined with 0.5 gallon of agricultural spray oil.

### CROP APPLICATION:

CROP	PEST	mL/16 L Water
Banana	Black Sigatoka	120
Mango	Anthraxnose	60-100
Potato	Late Polight	50-65
Tomato	Early & Late Blight Corcospora Leafspot	70-100
